

Open Source World

on December 23, 2019

Software center

- **pkgs.org** : The pkgs.org is created to provide you with the simplest method of searching and downloading the newest versions of the Linux packages without the usual excessive popups or spyware. 1,497 indexed repositories with 3,199,880 packages.
- **Fosshub** : FossHub is a part of FOSS community focused on providing downloads and hosting for the free projects. Direct download links, no further redirection, no waiting time, etc.

OS reviews

- distrowatch.com : DistroWatch is a website dedicated to talking about, reviewing and keeping up to date with open source operating systems. This site particularly focuses on Linux distributions and flavours of BSD, though other open source operating systems are sometimes discussed. There is a lot of information out there on Linux distributions and this site tries to collect and present that information in a consistent manner to make it easier to locate.

Resources

- undraw.co : A constantly updated collection of beautiful svg images that you can use completely free and without attribution. Open-source illustrations for every project you can imagine and create.
