

Audio Streaming PC to PC/Android

on February 13, 2019

Hello LNJPITians,

Today, I was wondering, is that any tool by which I can stream the audio of my pc to another pc or any android device. Sometimes your friends' laptop has better sound than yours and you want to stream audio to it.

I googled for it and found that there are so many tools, but many of them didn't work or their usage is not so easy.

But in the end, I got my new tool, it is a google chrome extension which allows you to stream your audio to other devices over the network. For this, you have to download and install the server software by which it allows to share the audio. Make sure both devices are in the same network.

The name of extension is **SoundIt** and the link is below:

<https://chrome.google.com/webstore/detail/soundit/jpmlghikapcebilgkglhelbdipdibmgd?hl=en>

The screenshot shows the Chrome Web Store page for the 'SoundIt' extension. The extension is offered by Gilad S. It has a rating of 4 stars (154 reviews) and 7,781 users. A 'Launch app' button is visible. Below the extension details, there are tabs for 'Overview', 'Reviews', 'Support', and 'Related'.

SoundIt Launch app

Download the server software from this windows.

After a few next clicks finally, click on share and you will get a window like below

Just enter this IP in your streaming device and enjoy. :)
