- **Hackerrank** : Very intuitive and have nice interface. Recommended for python. It is suggested to check discussion section where other programmer shares their ideas. Its founders are Vivek Ravisankar (NIT Trichy) and Hari Karunanidhi (NIT Trichy). Its headquarters is in Mountain View, CA, United States.
- **Hackerearth**: So many job hiring challenges. You can do coding fight in its **codearena**. Its founders are Sachin Gupta (IIT Roorkee) and Vivek Prakash (IIT Roorkee). Its headquarters is in Fremont, California, USA.
- **Interviewbit** : If you are preparing for campus placement or job interview then this website is highly recommended. Try to cover

all section. In each section there are multiple question of same type. First try to solve one problem from each section. Also its system designing and puzzle question are very helpful in interviews. They have also started academy and have postpaid schemes. Its founders are Anshuman Singh (IIIT Hyd) and Abhimanyu Saxena (IIIT Hyd).

- **Geeksforgeeks practice** : Geeksforgeeks is the all-in-one website for cse students. It has algorithms, gate, programming. Along with all these it also has practice section where you can practice. Although the test cases are not that much good as compared to hackerrank but the questions collection is very nice. You can solve question company wise and topic wise.
