

PHP_001 : Extracting numeric value from string and find their sum

on November 30, 2017

Input : 10abc20def30ghi40jkl50mno

Output: 10 20 30 40 50 and its sum.

```
<?php
    $str = "10abc20def30ghi40jkl50mno";
    $newstr="";
    for ($i=0; $i<strlen($str); $i++)
    {
        if(is_numeric($str[$i]))
            $newstr= $newstr.$str[$i];
        if($i==0) continue;
        if(!is_numeric($str[$i]) &&
substr($newstr,-1)!=" ")
            $newstr=$newstr." ";
    }
    echo $newstr;
    $arr=explode(" ", $newstr);
    echo "<br/>".array_sum($arr);
?>
```
