

# Notepad++ Plugins manager

on June 01, 2018

Hello everyone,

We all use text editors and some of these tools are our best one. I frequently use NOTEPAD++ for writting my codes. But in latest versions I felt some trouble while downloading the plugins, because the newer version doesn't have plugins manager.

So there is the solutions:

Go the below link:

<https://github.com/bruderstein/nppPluginManager/releases>

Download the zip file

and copy the plugins to plugins folder of npp and gpup to updater folder.

That's it

DOWNLOAD

TEXTEDITOR

WINDOWS
