

# Vim : a powerful text editor

on June 28, 2019

## What is Vim?

Vim is powerful text editor. You don't need mouse for this editor. All operation can be done via keyboard only. It is highly customizable. It is pre-loaded available in Linux and Apple OS X.

But one important thing, learning vim require some efforts. We are not habituated to do all by keyboard. So it will take some time to learn it.

So, now if you want to learn it and use it then keep reading, else you can stop by now.

For a quick tour you can go to <https://www.openvim.com/> and learn essential vim commands. As I mentioned vim is highly customizable, so in order to make it like you want you need to make some changes. You can get helps from <https://vimhelp.org/>

Here are few cheatsheets for vim.
