

# CherryTree : OpenSource Note Taking app

on February 01, 2020

A hierarchical note taking application, featuring rich text and syntax highlighting, storing data in a single xml or sqlite file. Written by Giuseppe Penone (aka giuspen).

## features :

1. rich text (foreground color, background color, bold, italic, underline, strikethrough, small, h1, h2, h3, subscript, superscript, monospace)
2. syntax highlighting supporting several programming languages

3. images handling: insertion in the text, edit (resize/rotate), save as png file
4. multi-level lists handling (bulleted, numbered, to-do and switch between them, multiline with shift+enter)
5. simple tables handling (cells with plain text), cut/copy/paste row, import/export as csv file
6. codeboxes handling: boxes of plain text (optionally with syntax highlighting) into rich text, import/export as text file
7. highlighting is configurable in the preferences dialog
8. alignment of text, images, tables and codeboxes (left/center/right/justify)
9. print & save as pdf file of a selection / node / node and subnodes / the whole tree
10. export to html of a selection / node / node and subnodes / the whole tree
11. export to plain text of a selection / node / node and subnodes / the whole tree
12. toc generation for a node / node and subnodes / the whole tree, based on headers h1, h2 and h3
13. find a node, find in selected node, find in selected node and subnodes, find in all nodes
14. replace in nodes names, replace in selected node, replace in selected node and subnodes, replace in all nodes
15. import from html file, import from folder of html files
16. import from plain text file, import from folder of plain text files
17. import from basket, cherrytree, epim html, gnote, keepnote, keynote, knowit, mempad, notecase, rednotebook, tomboy, treepad lite, tuxcards, zim
18. export to cherrytree file of a selection / node / node and subnodes / the whole tree
19. password protection (using <http://www.7-zip.org/>) – NOTE: while a cherrytree password protected
