Install MS Office in Ubuntu

on October 26, 2019

Installing MS office to Ubuntu is little bit tricky. We have to use WINE to install windows software on linux machine. We can find a solution in the below link. Following commands will install the dependencies.

[WineHQ - Microsoft Office (installer only) 2010 (32 bit)](#)

```
$ sudo apt-get install winbind
$ WINEARCH=win32 WINEPREFIX=~/.wineoffice2010 winetricks dot
$ WINEPREFIX=~/.wineoffice2010 wine Download/office/setup.ex
```

LINUX   UBUNTU   WINDOWS
