gpg: keyserver receive failed: Connection timed out
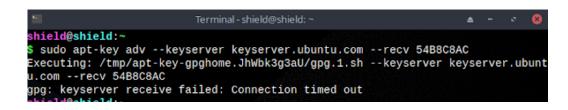

on February 05, 2020

Hockeypuck OpenPGP keyserver

Some adding keyserver doesn't work or timeout. For this we can get the public key directly from OpenPGP keyserver and add it to apt.

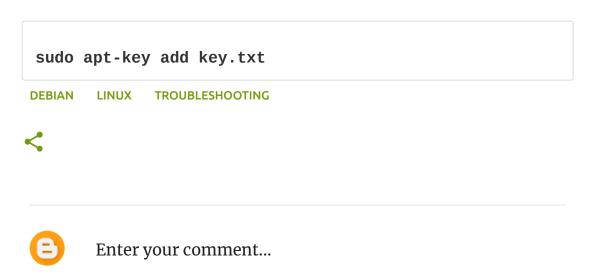

- Copy the code after --recv (54B8C8AC)
- Open http://keyserver.ubuntu.com/
- Paste it and append 0x before it

Hockeypuck OpenPGP keyserver

0x54B8C8AC

Search Key   Submit Key

Advanced Options

- Hit search key
- click on pub

pub rsa4096/29d76ada2d15a87bf4c68b823729827454b8c8ac 2014-08-14T19:40:21Z
        Hash=be3ec27b846323d7ee43300d8fc03d6f

-
- Copy the key and save it any file (key.txt)
- Now enter command

```
sudo apt-key add key.txt
```
