# EiskaltDC++

## EiskaltDC++

EiskaltDC++ is a cross-platform program that uses the Direct Connect (DC aka NMDC) and Advanced Direct Connect (ADC) protocols. It is compatible with DC++, AirDC++, FlylinkDC++ and other DC clients. EiskaltDC++ also interoperates with all common DC hub software.

Install via terminal :

`sudo apt install eiskaltdcpp`

Debian package tracker : https://tracker.debian.org/pkg/eiskaltdcpp
